WORK EXPERIENCE

QA Analyst (Software Tester)   **November 2023 – Present**
CalcMenu   *Ortigas Center, Pasig City*

- Perform functional, regression, integration, smoke, and shift-left testing for SaaS applications.
- Design and execute structured test cases, strengthening manual testing coverage and reliability for SaaS releases.
- Reduce manual encoding for product creation and price updates by 90% through validating AI-powered OCR.
- Identify and report defects using NuLab Backlogs, achieving a 95% resolution rate through effective cross functional collaboration.
- Validate product and pricing sync between SaaS and ERP, reducing errors and improving reliability.
- Maintain comprehensive test documentation, including test plans, test cases, and defect reports.
- Gain hands-on experience with Playwright to automate end-to-end testing and improve test coverage.

Lead Software Quality Engineer   **July 2024 – July 2025**
Arxon Solutions, LLC – Remote (Project under NDA)   *Roseville, CA, USA*

- Led QA efforts in developing a manual testing strategy focused on end-to-end testing of a SaaS-based EdTech platform for remote nursing licensure exam preparation.
- Collaborated closely with cross-functional teams to maintain release quality.
- Designed and executed test cases aligned with proprietary training methodologies.
- Mentored 3+ junior QAs, improving bug resolution rate by 20%.
- Performed regression, exploratory, and integration testing across multiple releases to ensure platform stability and educational accuracy.

Front-End Developer (Intern)   **June 2022 – July 2022**
Department of Information and Communications Technology (DICT - R4A)   *Batangas City, Batangas*

- Developed and implemented responsive and interactive components for a centralized certification generation portal.
- Conducted quality assurance testing to identify and resolve issues before deployment.

SKILLS
